

REMARKS/ARGUMENTS

The Examiner is requiring restriction to one of the following groups:

Group I: Claims 1-6, drawn to the method; and

Group II: Claims 7-10, drawn to the article.

Applicants provisionally elect Group I, Claims 1-6, drawn to the method, i.e., a method for preparing an oxygen radical-containing calcium aluminate film, with traverse on the grounds that no adequate reasons and/or examples have been provided to support a conclusion of patentable distinctiveness between the identified groups. Also, it has not been shown that a burden exists in searching the claims of the two groups.

Moreover, the M.P.E.P. at § 803 states as follows:

“If the search and examination of an entire application can be made without a serious burden, the Examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.”

Applicants respectfully submit that a search of all of the claims would not impose a serious burden on the Office.

Finally, Applicants respectfully submit that no lack of unity of invention has been acknowledged in the International Search Report for the PCT application upon which the present application is based.

Accordingly, and for the reasons presented above, Applicants submit that the Office has failed to meet the burden necessary in order to sustain the Restriction Requirement. Withdrawal of the Restriction Requirement is respectfully requested.

Applicants respectfully submit that the above-identified application is now in condition for examination on the merits, and early notice of such action is earnestly solicited.

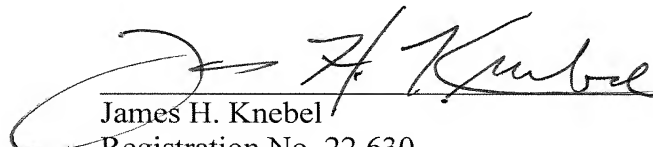

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
